SUMMIT 170

Type III

ADVANCED SAFETY, ERGONOMICS & FLEXIBILITY

Highly flexible design

The Summit is available in two design configurations; squad bench, CPR and attendant seating or Crestline's Medic-Safe seating with ergonomic, moveable bucket seats that fold down for a second patient transport or counter space.

Summit 170 features

The Summit has a spacious interior with 72" of headroom. The rear exterior door design provides increased headroom and patient privacy. The aluminum cabinets have rounded corners and more padding for safety. The interior LED lights are color balanced for accurate skin pallor diagnosis and provide ambient options for long transports. 3M noise reduction material also added to provide a more relaxing ride. Choice of the AceTech Integrated Vehicle Intelligence System or a conventional wiring system.

CrestCoat exclusive powder coat technology
Advanced durability and corrosion protection

CrestClean antimicrobial coating
Provides a sanitary working environment

Maximum Equipment Storage
Full height compartments for more capacity & flexibility

Streetside exterior compartments
