

# CRESTLINE<sup>®</sup>

World Class Safety and Innovation<sup>™</sup>

## THE CRESTLINE ADVANTAGE

Safety • Innovation • Durability

### SAFETY

One of the safest ambulances for patients and medics.

One of the safest roll cages in the industry

Bended roof tubes increases strength (no welds) and exceeds PAMI test requirements, creating a seamless monocoque body.

Rounded corners with extra padding

Enhanced paramedic protection during transport and collision.

Medic-safe seating

Movable bucket seats that provide ergonomic advantages with easy access to patient and equipment.

CrestClean antimicrobial coating

Powder coated surfaces with antimicrobial additives that prevent and protect surfaces from the growth of bacteria and destructive microorganisms.

One of the safest roll cages

O<sub>2</sub> to Go reduces risk of injuries

CrestCoat lifetime protection

Crestline ambulances are built with *safety, innovation and durability in mind.*

## INNOVATION

Crestline focuses on innovative designs with ergonomics and flexibility.

### O<sub>2</sub> to Go reduces risk of injuries

This exchange system assists personnel in loading, unloading and transporting high pressure tanks in a safe and effective manner.

### Lower operational costs & downtime by eliminating corrosion

CrestCoat exclusive powder coat technology is the ultimate corrosion protection and is backed with a lifetime paint warranty.

### Cab design & driver's console

Ergonomic solutions to make paramedics jobs easier and provide the most comfortable working environment. Includes the deepest recess in the industry, convenient location of the map bin and optional laptop mount. Optional camera system with recording capabilities.

### Multiple O<sub>2</sub> ports & switching locations

Offers the convenience of having oxygen outlets at various locations as well as the ability to provide oxygen to multiple patients.

### ACETECH Integrated Vehicle Intelligence solution

Optional vehicle performance, monitoring and control system. Elevate efficiency, protect your vehicles and staff while reducing fuel and operating costs.

### New style exterior doors provides improved patient privacy

Stronger rear doors with a 40/60 split and gas shocks that hold the doors open. Improved door seals and latch on the inboard side greatly reduces failures. This design provides improved patient privacy and protection.

## DURABILITY

Crestline ambulances are built to last. Our ambulances have a lower cost of ownership due to their superior durability.

### CrestCoat is one of the safest, most reliable & cost-effective corrosion protection

Provides superior corrosion resistance and industrial strength durability properties.

### Higher fuel efficiency

Due to lower vehicle weight and aerodynamic design.

### Simple wiring designed to minimize failure

Easy to diagnose and repair in the field.

### Seamless exterior body provides advanced durability

Eliminates the risk of paint cracking and bubbling resulting in vehicle downtime.

### Ducted HVAC system designed for ease of maintenance

Offers improved air output throughout ambulance.
